CERTIFICATIONS

Certified GoHighLevel Admin
HighLevel · 2025

Software Engineering Degree
IAI Cameroun · 2023

TECHNICAL TOOLKIT

LANGUAGES

TypeScript · JavaScript · HTML ·
CSS · SQL · C#

FRONTEND

Vue 3 / Nuxt 3 · React / Next.js ·
responsive layouts ·
Chrome extensions

BACKEND

Node.js · NestJS · Prisma ·
REST APIs · webhooks · OAuth ·
MCP servers

DATA & QUEUES

Redis · BullMQ · MySQL

DEVOPS

Linux VPS · Docker · nginx ·
DNS & SSL · Cloudflare · Git

TESTING

Playwright

INTEGRATIONS

GoHighLevel API v2 · Stripe ·
Zapier · Make ·
n8n (working knowledge)

Tchuente Yadou Yvan

Full-Stack Software Engineer (TypeScript)

GHL Certified Admin

◆ ABOUT ME

Full-stack software engineer working mainly in TypeScript: Node.js/NestJS APIs with Prisma, Redis and BullMQ, Vue 3/Nuxt 3 and React front ends, deployed on Linux with Docker and nginx. I build and run my own SaaS end to end and integrate third-party APIs every day.

◆ SELECTED PROJECTS

- ◆ **GLaunch PM:** project management SaaS for GHL agencies. NestJS + Prisma REST API, BullMQ/Redis background jobs, Nuxt 3 front end, an MCP server so AI assistants can read and update boards, and meeting-to-task automation from call recordings. Deployed on a Linux VPS behind nginx.
- ◆ **Funnel Twin (in progress):** Chrome extension that captures a GHL funnel page and recreates it in another account by replaying the page builder data.
- ◆ **AI workspace server (client work):** MCP server on a Linux VPS that connects a client's AI apps, Google Drive files and meeting notes in one workspace.

◆ EXPERIENCE

Founder & Software Engineer, CYSN

Apr 2026 – Present

Independent (US LLC)

- ◆ Design, build and deploy my own SaaS products end to end, from data model and API to front end and server.

GHL Expert (VA), GHL Plugins

Jan 2024 – Present

VGroup SARL (US agency team, remote from Cameroon)

- ◆ Build complete CRM and automation systems on GoHighLevel for US agencies and their clients: pipelines, custom objects, funnels, calendars and nurture.
- ◆ Write custom HTML, CSS and JavaScript for GHL pages, and integrate GHL with other apps through the GHL API v2 (OAuth), webhooks, Zapier and Make.
- ◆ Deployed client web apps on Linux VPS with nginx, SSL and DNS.
